

# Warm Air with Passion

A new standard in convective air warming

## The silent power

The new Mistral-Air® blower combines modern design with power and simplicity. It is very quiet and produces a constant temperature to your patient. This makes the new Mistral-Air® blower exceptionally good to use inside the Operating Theatre or Intensive Care environment.

### Silent

The difference between talking and whispering.

When developing our new blower, a lot of attention is paid to the sound level. With only 48 decibels it is one of the quietest blowers on the market.

### Powerful

The Mistral-Air® blower is very powerful and provides in combination with Mistral-Air® blankets optimal warming of your patient.

## Technical specifications

Article number	MA0100
Current	7A
Power	1560 W
Sound level	48 db
Air flow	42 - 45 cfm
Dimensions	22,5 x 25 x 28 cm
Length of hose	1,8 m
Voltage	220-240 VAC
Classification MDD	Class IIb
CE-certification	CE 0344
Set point temperature	32 °C, 38 °C of 43 °C
Filtration	0,3µm, high efficiency
Weight	5,8 kg
